

Dermatology/Allergy Client Questionnaire

Date: _____ Name of person completing this form: _____

1. What skin or ear problem are you bringing your pet in for?

2. For how long has the problem been present? _____ How old was your pet when the problem first started? _____

3. When the problem started, did it come on suddenly or gradually over a period of time?

4. What did the skin or ear problem look like initially?

5. How has it changed or spread?

6. Have the problems been (check one): Continual, even with medications Continual, but better when on medications Intermittent or sporadic

7. Is the problem worse during certain times of the year? If so, when?

8. Over the past year, how itchy has your pet been during a typical outbreak of skin or ear disease? Use a scale of 1 to 10 where 1 means an occasional scratch, like a normal person or animal might do, and 10 means constant, severe scratching. Write a number from 1 to 10 here:

9. Using the same 1 to 10 scale, how itchy has your pet been over the past one month? Write a number from 1 to 10 here: _____

10. Is your pet receiving any treatment now? If yes, what kind?

11. When did your pet last receive any medication - and what medication was it?

12. What do you feed your pet now?

13. Have any different diets been tried as treatment? If so, list the brand name and for how long you fed it: _____

14. How often do you usually bathe your pet? _____

With what? _____

15. When was the last time you saw a flea on your pet or another pet in the household?

16. Do you routinely use flea or tick prevention products on your pet (list type)?

17. How old was your pet when you obtained him/her? _____ Where was your pet obtained? _____

18. What other pets are in the household?

19. Do any of the other pets have skin problems? _____ Do any humans in the household have skin problems? _____

20. What percentage of the day and night does your pet spend indoors vs. outdoors? Percent of time indoors: _____% Percent of time outdoors: _____%

21. Other than skin disease, does your pet have any diagnosed medical problems?

22. Are there any other symptoms that your pet has that have not been described above, or is there anything else you think might be contributing to your pet's skin or ear disease?

23. In the following table, check ✓ which symptoms have been present and how severe they have been over the entire course of the pet's skin or ear problem. (Check one box ✓ for each symptom)

Symptom	Never Occurs or None	Occurs Rarely or Slight	Occurs Occasionally or Moderate	Occurs Often or Severe
Hair loss or poor regrowth of hair				
Increased redness to skin				
Small red spots, pimples, bumps, rash				
Dandruff, flakiness, scaliness of skin				
Increased odor of skin or coat				
Crusty or scabby patches on skin				

Open, raw sores				
Areas that ooze blood or pus				
Eyes - redness, irritation, itching, discharge				
Change in color or texture of hair Darkening of areas of the skin				
Loss of pigment of skin-black parts turn pink				
Ear infections				
Fleas seen on pet				
Diarrhea or loose stools				
Vomiting				
Sneezing or wheezing				
Changes in pet's usual personality				
Changes in pet's usual activity level				
Weight loss or weight gain				
Changes in pet's appetite				
Changes in amount of water consumed				
Changes in urinary habits				

24. How much licking, biting, chewing, scratching, or rubbing does your pet do on the following areas of the body? (Check one box ✓ for each symptom)

BODY AREA	Not Itchy	Mildly Itchy	Moderately Itchy	Severely Itchy
Feet/paws				
Legs/arms				
Abdomen (belly) / genital area				
Armpits / chest / sides of body				

Face / eyes				
Along the back or rump				
The tail itself				
Anal area				
Ears / ear flaps				

25. It is important that we know which types of medications were given to your pet in the past, and whether they helped. On the list of medications below, check if they have been given, and if so, how much relief they produced. (Check box "YES" if given, then how much the treatment helped)

Treatment or Medication	Given	Not Given	Not Sure	Did Not Help	Helped Some	Helped A Lot
Cortisone pills or shots (steroids, Temaril, prednisone, Vetalog, anti-itch pills)						
Antibiotics alone (with no other medication given at the same time)						
Antihistamines (Benadryl, Zyrtec, etc.)						
Antifungal medications (ketoconazole, etc.)						
Cyclosporin (Atopica)						
Apoquel						
Allergy shots or drops						
Cytopoint
